Contractor's License #: C32723

In 2015, Aquatic Solutions Hawaii constructed an inground pool conveniently tied to the back patio adjoining the residence.

The Client

Located near Secret Beach, Oahu, Hawaii on the east side of the island, the Last Family enjoys some of Hawaii's most spectacular scenery and beautiful secluded beaches.

The Challenge

The pool project needed to blend with the ocean side environment of the area as well as the home's architectural elements. With a half mile of soft white sand, turquoise water and gentle breezes, neaby Kailua Beach Park located on the Windward Coast is a local favorite. As a hub for water sports, it welcomes visitors to windsurf and kayak.

The Process

- 1) Here is the beginning of the site excavation where the pool's general form takes shape.
- 2) This is the "metal" stage of the pool construction and forms the pool's skeleton in preparation for the gunite.
- 3) Once the gunite is cured, the supporting forms are pulled and the project is being prepared for the coping, tiling and decking.
- 4) The heart of the pool's mechanics are show here. This includes all of the VFD pumps and state-of-the-art filtration systems. Before completion, all components are thoroughly tested.
- 5) Shows the project nearly finished.
- 6) The final project with a cover, with some the landscaping in place. Other finishing touches to follow.

Result

We accomplished this project in four weeks - on time and on budget.

Designing and building a pool for your home is an exciting project.

Aquatic Solutions Hawaii can assist you with this exciting challenge by working directly with your designer, engineer or architect. Or, we can help you find these resources.

Please find a complete step-by-step guide to planning and building an inground pool on our website. We are always available for a free consultation.
