In 2017, Aquatic Solutions Hawaii constructed a custom in-ground pool and spa, along with an intricate tiled deck in the residence's private backyard.

The Client

Located in Kailua, Oahu, Hawaii on the east side of the island, the Last Family enjoys some of Hawaii's most spectacular scenery and beautiful secluded beaches.

The Challenge

The pool project needed to blend with the ocean side environment of the area as well as the home's architectural elements. With a half mile of soft white sand, turquoise water and gentle breezes, nearby Kailua Beach Park located on the Windward Coast is a local favorite. As a hub for water sports, it welcomes visitors to windsurf and kayak.

The Process

- 1) Here the pool takes shape after excavation and application of steel reinforcement.
- 2) The pool, spa and steps evolve after the gunite pouring and shaping. Once cured, the supporting forms are pulled and the project is prepared for the coping, tiling and decking.
- 3) Shows the project nearly finished as plaster is painted and tile is grouted.
- 4) Here is the detail of how the tile integrates the deck with the spa.
- 5) Completed look at the project. The pool is controlled by Pentair's IntelliTouch and EasyTouch Pool and Spa Control Systems.
- 6) Spa's working! Time for a dip.

Result

Project completed from start to finish in about 8 weeks. Considering the complexity of this installation, we feel proud of this accomplishment. And, the Roncska's love it!

Designing and building a pool for your home is an exciting project.

Aquatic Solutions Hawaii can assist you with this exciting challenge by working directly with your designer, engineer or architect. Or, we can help you find these resources.

Please find a complete step-by-step guide to planning and building an inground pool on our website. We are always available for a free consultation.
